

THE STUDIO PROJECTS LSD2 HELPS CONVEY THE BAROQUE IN RECORDING THE MISSA VOTIVA

Geisenheim, Germany
September 10 and 11, 2011 -
Recording Engineer Joseph
Kanz brought his mobile record-
ing setup to the Johannisberg

Basilica and
Geisenheim
Cathedral to
capture Musica
Antiqua Frankfurt

and Neue Rheingauer
Kantorei's (NRK) performances
of Jan Dismas Zelenka's Missa
Votiva. The small orchestra and
choir performed the emotionally
expressive piece over the
course of two days in the two
locations in Geisenheim, Ger-
many. The best parts of each
performance were combined
seamlessly on a Promotion-CD

released (for
members, friends
and supporters of
NRK) in Novem-
ber 2011 by
Neue Rheingauer
Kantorei.

The perform-
ances were
captured using a
small mixing
console and a
single Studio
Projects' LSD2
microphone in a
Blumlein configu-
ration. The
recording has an
incredible stereo
image and feels
like you are
almost sitting on
a pew in
Geisenheim.

Joseph
expresses his
satisfaction with
the LSD2: "The

*Musica Antiqua Frankfurt and Neue Rheingauer Kantorei at
Geisenheim Cathedral*

Blumlein configuration is a real
wonder: you hear all
instruments at their exact place,
the sound remains in the middle
and you need no matrix, or
other electronic toys. The sound
is open and free and contains
the entire spatial information.
But the ensemble has to be well
balanced, even the room where
you record music! I am always
pleased with my experience
with the LSD2!"
